

THE BEST COMPANY

Estate Valuations & Pricing Systems, Inc. (EVP Systems) provides securities valuations for estate and gift taxes, in accordance with modern compliance regulations and technical requirements.

Redundant Capacity: EVP Systems runs two full geographically diverse data centers, each capable of handling the full system load, and tests fail-over quarterly.

24/7 Monitoring: EVP Systems constantly monitors uptime, availability, and over two dozen other critical metrics for their production environment, immediately alerting staff if problems are found.

Standard Builds: Every computer at EVP Systems—from laptops to servers—is installed according to documented and repeatable standards.

Documented Development Process: All software released by EVP Systems is subject to static analysis, unit and regression testing, and a host of quality reviews.

GDPR and CCPA Compliant: EVP Systems Windows software suite—EVP Office—is fully GDPR and CCPA compliant, and transmits no Personally Identifiable Information (PII) to our servers.

Security Audits and Notifications: We have written information security policies, complete with automated log analysis, client notification requirements, and regular employee education.

Documented Privacy, Risk Discovery, Asset Management, Ethics, and Social Responsibility Policies: The company takes its responsibilities to our clients seriously, and provides written processes and procedures for all the concerns and compliance requirements of modern businesses.

Background Checks and NDAs: Every employee at EVP Systems is subject to a criminal background check before they're hired, and signs a non-disclosure agreement.
